

PROJECT PROFILE:  
**ITF WEST PARKING STRUCTURE AT LAX**  
*Los Angeles, California*

**Project Overview**

ITF West project, an economy parking deck at Los Angeles International Airport, used the Poly-I-Gard 575FC (fast cure) traffic coating system. Best Contracting Services was able to install over 600,000 square feet of the Polyprime 2180SC primer, PC 260 basecoat and Poly-I-Gard 295 top coat.

**Products Used:**

**Poly-I-Gard 575FC Vehicular Traffic Deck System:**

- **Polyprime 2180SC** primer at 10–12 mils WFT
- **PC-260** basecoat at 24–26 mils WFT
- **Poly-I-Gard 295** top coat (two coats) at 12–14 mils WFT each, with sand broadcast to refusal in the first layer
