For exact color ask for a draw down sample

This color guide is only an approximation of color for computer monitor or color printer representation. Various types of computer monitors, graphic cards and color printers all have their own special characteristics for displaying and printing colors. All monitors and printers will show slight variations in color from one model to another. Polycoat Products cannot guarantee that the colors you see on your monitor or print on your color printer will correspond exactly to the actual Polycoat Products color range.

Not all colors are available in all products. Refer to the data sheets for the color availability of the product desired. Polycoat Products will gladly develop custom colors. Additional charges and minimum order apply. Contact Polycoat Products for more information.

When color matching is critical, please request a drawn down film sample from Polycoat Products before placing your order.
