**Product Description**
Polyprime® 3042 is a two component, liquid applied primer. This primer has been developed for use on carbon steel, non-ferrous metal, fiberglass, PVC pipe, as well as concrete and masonry.

**Features**
- Low Viscosity Epoxy Coating
- Provides Limited Chemical Resistance
- Surface Tolerant Primer/Sealer
- Versatile Application: Spray, Roll or Brush

**Typical Uses**
- Chemical & Pharmaceuticals Industries
- Concrete Floors and Decks
- Food Processing Facilities
- Industrial Flooring
- Mining and Milling Industry
- Petrochemical Plants
- Power Generating Plants
- Pulp and Paper Industry
- Steel Structures and Bridges
- Water & Wastewater Treatment Plants

**Technical Data** (Based on Draw Down Film)

**Carbon Steel**: Use SSSP Guidelines for surface preparation. Acceptable systems include SP-6 (Commercial Blast), SP-3 (Power Tool/Hand Tool), SSSP-SP-2, 3, 6 or SP-12 (WJ-3).

**Aluminum**: Remove oil, grease, dirt and other contaminants with neutral detergent and treat with Alondine® 1200 or equal. Light abrasive blasting is also acceptable.

**Galvanized Steel**: Remove all contaminants such as oil, grease, dirt or residues with a neutral detergent and treat with Galvaprep®. Light abrasive blasting is also acceptable.

**Existing Coatings**: Use SSSP guidelines for re-coating methods, recommended systems are SP-7 Abrasive blast or SP-3 Power Tool cleaning. Pressurized water at 2000 psi may also be used in conjunction with abrasive blasting or Power tool cleaning. Apply a test patch to check adhesion before topcoating.

**Concrete**: Pressure wash (2000-3000 psi) with clean fresh water in conjunction with biodegradable cleanser if necessary.

**Packaging**
- **3-Gallon Kit**: One 3.5 gallon pail, net fill 2 gallons (7.57 liters) of Side-A and One 1 gallon (3.78 liters) can of Side-B
- **15-Gallon Kit**: Two 5 gallon (18.9 liters) pails of Side-A and One 5 gallon (18.9 liters) pail of Side-B

**Color**
- Side-A: Grey, Side-B: Clear

**Coverage**
The approximate coverage is 1 gallon/300 sqft (0.14 l/sqm) or 300 sqft/gallon. Coverage rate will depend on surface roughness and porosity.

**Surface Preparation**
In general, coating performance is directly proportional to surface preparation. All surfaces must be free of oil, grease, dirt and other contaminants. Refer to General Guidelines for complete information.
to remove all contaminants. Surface shall be dry and free of all oils, wax or any loose sealers or coatings. Use SSSP guidelines for abrading the surface such as SP-7 Brush-off blast cleaning.

Apply over prepared or suitably prepared carbon steel, galvanized steel, concrete or aluminum.

**Mixing**

The volume mixing ratio is 2 parts Side-A to 1 part Side-B (2A:1B). Do not mix in an up and down motion.

Polyprime® 3042 Side-A and Side-B should be thoroughly mixed individually prior to combining to ensure a homogeneous material. Polyprime® 3042 must always be mixed with two parts Side-A and one part Side-B (2A:1B). The combined components should be thoroughly mixed using a mechanical mixer at slow speed.

Polyprime® 3042 may be diluted with either PM Acetate or MEK within the regional air pollution regulations. Clean all application equipment with xylene, MEK or other appropriate solvents. Power stir product until uniform color appears, approximately 5 minutes.

Polyprime® 3042 is very sensitive to heat and moisture. Higher temperature will accelerate the cure time. Use caution in batch sizes and thickness of application. Low temperature extends the cure time and the use of accelerators may be necessary.

**Application**

Polyprime® 3042 should be applied at the rate of 1 gallon (mixture of Side-A & Side-B)/300 sqft (0.14 liters/sqm). Coverage rate will depend on surface roughness and porosity. It can be applied using an airless sprayer, brush, or phenolic resin core roller.

Application temperature for Polyprime® 3042 should be between 60-95°F (15-35°C). Do not apply product unless temperature is at least 5°F (3°C) above the dew point. Recoat schedule is 2-36 hours dependent upon environment. See Specification Guide for re-coating guidelines and additional information.

Airless Spray: Use Graco 28:1 pump or higher, Binks “Airless” spray gun with Reversa-Clean 0.017-0.019 spray tips with a 1” fluid line, adjust pump pressure to the lowest possible setting that provides proper atomization. Equipment of equal performance is acceptable.

Conventional Spray: Variations of conventional production spray equipment such as pressure pot, air assisted, airless or high volume, low pressure systems as supplied by Binks, Graco, Nordson, Devilbiss or equal may be used. See Specification Guide for additional information.

Brush: Use mohair or natural bristle brush with feather edge. Roller: Use phenolic core, short nap sheepskin or equal natural roller covers.

**Cleanup**

Equipment should be cleaned with an environmentally safe solvent, as permitted under local regulations, immediately after use.

**Storage**

Polyprime® 3042 has a shelf life of 1 year from date of manufacture in original, factory-sealed containers when stored indoors at a temperature between 60-95°F (15-35°C).

**Limitations**

Polyprime® 3042 should be coated within 36 hours after it has become tack free. Not UV stable. Surfaces must be dry, clean and free of foreign matter. Containers that have been opened must be used as soon as possible.

Polyprime® 3042 is difficult to clean up after it has cured. Mix no more material than can be used within minutes.

**Warning**

This product contains Epoxy Resin and Curing agents.

**Limited Warranty:** Please read all information in the General Guidelines, Technical Data Sheets, Guide Specifications and Safety Data Sheets (SDS) before applying material. These products are for professional use only and preferably applied by professionals who have prior experience with the Polycoat Products materials or have undergone training in applications of Polycoat Products materials. Published technical data and instructions are subject to change without notice. Contact your local Polycoat Products representative or visit our website for current technical data, instructions, and project specific recommendations.

Polycoat Products warrants its products to be free of manufacturing defects and that they will meet Polycoat Products’ current published physical properties. Seller’s and manufacturer’s sole responsibility shall be to replace that portion of the product which proves to be defective. There are no other warranties by Polycoat Products of any nature whatsoever expressed or implied, including any warranty of merchantability or fitness for a particular purpose in connection with this product. Polycoat Products shall not be liable for damages of any sort, including remote or consequential damages resulting from any claimed breach of any warranty whether expressed or implied. Polycoat Products shall not be responsible for use of this product in a manner to infringe on any patent held by others. In addition, no warranty or guarantee is being issued with respect to appearance, color, fading, chalkling, staming, shrinkage, peeling, normal wear and tear or improper application by the applicator. Damage caused by abuse, neglect and lack of proper maintenance, acts of nature and/or physical movement of the substrate or structural defects are also excluded from the limited warranty. Polycoat Products reserves the right to conduct performance tests on any material claimed to be defective prior to any repairs by owner, general contractor, or applicator.

**Disclaimer:** All guidelines, recommendations, statements, and technical data contained herein are based on information and tests we believe to be reliable and correct, but accuracy and completeness of said tests are not to be construed as a warranty, either expressed or implied. It is the user’s responsibility to satisfy himself, by his own information and test, to determine suitability of the product for his own intended use, application and job situation and user assumes all risk and liability resulting from his use of the product. We do not suggest or guarantee that any hazard listed herein are the only ones which may exist. Neither seller nor manufacturer shall be liable to the buyer or any third person for any injury, loss or damage directly or indirectly resulting from use of, or inability to use, the product. Recommendations or statements, whether in writing or oral, other than those contained herein shall not be binding upon the manufacturer, unless in writing and signed by a corporate officer of the manufacturer. Technical and application information is provided for the purpose of establishing a general profile of the material and proper application procedures. Test performance results were obtained in a controlled environment and Polycoat Products makes no claim that these tests or any other tests accurately represent all environments.
